

## BIOHAZARD DECONTAMINATION

AIR is frequently called upon following traumatic and unexpected events. We safely and discretely address building materials and items contaminated or potentially contaminated with pathogens. AIR is a trusted partner to municipalities, government agencies, public safety departments, and property management companies, as well as insurance companies, relating to the decontamination and disinfecting of buildings, vehicles, or any property that has been impacted.

Common sites that we clean up and sanitize:

- **Holding cells**
- **Police Cruisers**
- **Ambulances**
- **Residential Hoarding**
- **Unattended death scenes**
- **Crime scenes/Accident scenes**
- **Public offices, facilities, transportation hubs**
- **School classrooms, dormitories, common areas**
- **Locker rooms/Fitness centers**
- **Healthcare facilities**

### Typical office germ counts (Top 5 areas):

Phone:	25,127 microbes per sq. inch
Desk:	20,961 microbes per sq. inch
Keyboard:	3,295 microbes per sq. inch
Mouse:	1,676 microbes per sq. inch
Fax:	301 microbes per sq. inch

AIR technicians are trained and certified to OSHA requirements and are ABRA\* certified technicians. This ensures a proper response, clean up, transportation and disposal of hazmat and biohazard waste.
