

## PrepAIR: EMERGENCY RESPONSE PROGRAM

### Business Continuity Preparedness

*Every hour of downtime represents frustration; and moreover, lost revenue. Having an organized plan in place before a disaster happens drastically reduces the costs to repair damage to the property. AIR's Emergency Response Plan is designed to help reduce financial impact for businesses of all sizes and types by providing an effective, proactive approach to mitigating property loss and limiting operational downtime.*

Our ERP Program helps to organize business critical information for use in times of a disaster. AIR works with building management to survey the property and prepare information that is helpful in efficiently responding to various disaster situations. We document or capture the following with program participants:

- Critical contacts
- Emergency shut-off locations
- Critical asset inventory
- Work pre-authorizations
- Insurance/coverage Information
- Emergency SOP's
- Building dimensions & evacuation routes

The benefits of program participation are:

- Development of a practical **action plan** to be implemented in the event of property damage
- AIR's **targeted response** when needed, based on pre-existing knowledge of the building information and business operations
- **Dedicated direct dial** number and priority dispatch/response
- Pre-established **pricing** for services and equipment
- PrepAIR program enrollment is offered at **no cost** to qualifying property owners/managers.

### Typical emergency services

- Water extraction
- Structural drying
- Board-up & Temporary weatherproofing
- Biohazard decontamination
- Hazardous material remediation
  - Mold remediation
  - Lead renovation
  - Asbestos remediation
- Soot, smoke & odor removal
- Soft contents restoration
- Hard contents restoration
- Electronics contents restoration

American Integrity Restoration is a DKI Member Company, the largest disaster restoration network in North America. This brings our customers the added assurance of our ability to respond in times of widespread disasters. The DKI catastrophic response network can be activated to provide AIR with the expertise and equipment necessary to assist our customers in urgent times of widespread distress.

Further, our fellow DKI member companies adhere to the same strict standards for employee screening and technician certification, to ensure a consistent and correct emergency response.
